

FIG. 2

FIG. 4

FIG. 5

FIG. 12

A cross-sectional view of a device 10, which is a curved, elongated structure. The device has a central core 18 and an outer layer 20. A layer 22 is shown on the inner surface of the core, and a layer 24 is on the outer surface. A layer 32 is located between the core and the outer layer. A layer 34 is on the inner surface of the core, and a layer 36 is on the outer surface. A layer 38 is located between the core and the outer layer. A layer 40 is on the inner surface of the core, and a layer 50 is on the outer surface. A layer 52 is located between the core and the outer layer. A layer 56 is on the inner surface of the core, and a layer 58 is on the outer surface. A layer 60 is located between the core and the outer layer. A layer 132 is on the inner surface of the core, and a layer 134 is on the outer surface. A layer 136 is located between the core and the outer layer. A layer 138 is on the inner surface of the core, and a layer 139 is on the outer surface.

FIG. 13

FIG. 13 is a perspective view of a second embodiment of a shoe sole assembly. The sole is shown in a perspective view, with various components labeled with reference numerals. The sole is shown in a perspective view, with various components labeled with reference numerals. The sole is shown in a perspective view, with various components labeled with reference numerals.
